

Exit Reality

Where will you go?

Bringing New Worlds to Your World

On the conference floor, every square foot costs thousands of dollars. With Virtual Reality on offer, your display will be the envy of the event and everyone will want to spend time in your environment. In VR, your prospective customers can roam through endless territory designed to show off your offering. Whether as a tool to bring traffic to your booth, or by offering original content, VR can serve as a dramatic force multiplier on your conference investment.

The Exit Cubes

Our hand-crafted Exit Cubes evoke the golden age of air travel. The timeless look of riveted aircraft aluminum fits virtually any decor or environment. Our compact design means our Cubes can be installed in almost any space. And each of our Exit Cubes uses top-of-the-line computer hardware paired with HTC Vive VR gear. For the truly discerning, we can also craft unique, one-of-a-kind Cube designs that match any environment.

Team and Collateral

We provide dedicated professional staff to operate our Exit Cubes to ensure your customers have the best experience possible. In addition to staff, we provide artistically illustrated instruction manuals for visitors to prepare for their experiences. If you wish, we can also train your own staff to run and operate installed Exit Cubes.

Virtually Amazing

Exit Reality can take your attendees to any imaginable world. Delight and engage your customers in ways they've never imagined. Reach out to discover how virtual reality can transform your business.
